

Course name: Machine Fault Diagnosis and Signal Processing By Prof A R Mohanty

<https://nptel.ac.in/courses/112105232/>

Dear Students

The course is actually designed as a certification course.

However our **Condition Monitoring** needs are met by the following lectures.

Week 1 and 2. (SKIP WEEKS 3, 4 and 5)

Week 6 to Week 12.

Please see these videos and there are downloadable Pdf documents as well for the lectures. Take your notes based on these videos like you would in the class environment.

Contact me for any clarifications on shahid@nitsri.net

Take care and stay safe All of you.

Dr. Shahid Saleem
