DEPARTMENT OF HUMANITIES SOCIAL SCIENCES & MANAGEMENT
NATIONAL INSTITUTE OF TECHNOLOGY SRINAGAR (J&K)

RETHINK, REINVENT, REINNOVATE

TOWARDS A NEW BEGINNING

Strategic Intent

“The essence of strategy is choosing what not to do.”

Michael Porter

VISION

To lead in innovative teaching, knowledge building, and value based educational experiences by providing quality education.

MISSION

To develop strong critical thinking, analytical reasoning, problem solving, management and communication skills in students with creative talent that will foster their development as knowledgeable, engaged and confident citizens and leaders.

From The Director's Desk

Prof. Rakesh Sehgal
(Hon'ble Director, NIT Srinagar)

A humanities and social sciences department must hold a special position in every technical institute. I believe that it must be one of the vibrant departments, especially in an engineering institute. However, when I joined NIT Srinagar as its Director, I observed the Department of Humanities, Social Sciences & Management (HSS&M) as one of the lagging yet a prospective part of the Institute. From day one I wanted this department to grow and shine. The former HoDs (Prof. M. F. Lala and Prof. Mir Mukhtar Ahmad) and now Prof. Abdul Liman share the same vision that I had for the department.

I must say the department is on the right path towards what we have set our goals for. The academic years 2019-20 and 2020-21 have been a wonderful journey for the Department of HSS&M. The stakeholders of HSS&M kept me busy and bound with many proposals, approvals, and inaugurations. With a little guidance from me and a lot of efforts from each stakeholder of HSS&M, we were able to host multiple events and workshops, the glimpse of which you will find in this Bulletin. I, along with the administration of NIT Srinagar, developed a team of young, energetic, and dynamic individuals at HSS&M who found their path to success on which they have started the journey. They will crawl, will slip away, will be detracted, and face hardships, but I am sure, with the enthusiasm they have, they will reach the top.

I have a vision of making this Department a Temple of Learning, Mecca of Knowledge, and a Centre for Excellence. With these words, I invite you to have a look at the short yet impactful journey of a new version of HSS&M.

Message From The Head

The Department of HSS&M is amongst one of the earliest departments that were established in erstwhile REC, Srinagar. Right from its inception to the present day, the department has been actively involved with teaching and research activities. The department has a long history of contributing to all areas of institutional development.

With the passage of time, the department has tried its best to bring the academic and research outlook of the department in line with socio-economic scenario. The developing corporate culture has required the department to change and update the existing course lines and introduce new programmes (MBA & MSc. TIED) so that the students get familiarized with the grooming demands of the society and changing/grooming industrial setup.

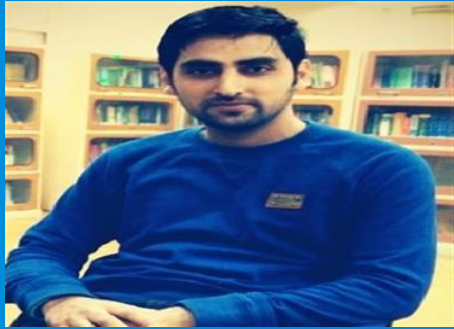

At present the department has very exhaustive expansion programme. Latest technologies are being adopted to make the teaching and research process student friendly. The establishment of state of art language laboratory is a step in this direction as it is a platform to improve both speaking and writing skills of students and make them suitable for absorption in the national and multi-national companies.

As far as research programmes of the department are concerned, I would take the opportunity to say with pride that present faculty is skilled enough to teach any specific /general areas of industry or social interest. The number of research scholars is increasing every year and apart from industrial or corporate related research, other areas like language, communication skills etc. have also found a place in department research programme. The department is now a full-fledged research center. Thanks to present Hon`ble director and other previous faculty members who definitely need a mention for their cooperation.

Prof. Abdul Liman
Head Department of HSS&M

ESTABLISHMENT OF LANGUAGE LAB

Established under TEQIP-III

Digital Language Lab

- A state-of-the art digital Language Lab runs in the Department of Humanities, Social Sciences & Management. This lab, inaugurated on 15th May 2019, caters to the language requirements of the students at basic, intermediate, and advanced levels. The students can improve their grammatical, vocabulary, and technical writing skills. They can also hone their listening, speaking, and pronunciation skills.
- The language lab has 30 desktops installed with “Words Worth language lab software” and AV equipment. It has a 65-inch touchscreen connected with instructor console unit. The software offers interactive training through rich audio-visual content alternating between Instructor Led Training and Computer Based Training sessions. Through such sessions, students can acquire vocabulary and language structures for participating in day to day communications. They learn to use grammatically accurate sentences while speaking confidently. They enhance their verbal communication skills through free speech, role plays, activities, and interaction. The lab is air-conditioned and sound-proof to make language learning experience comfortable and distraction-free.
- The language laboratory contributes to the administration of a credit course on Language (Course Code: HUP100) to the first year B. Tech students. The course is designed to run parallel to the Basic English and Communication Skills course and Advanced English and Communication Skills Course of the academic syllabus for the 1st and 2nd Semester.
- The lab envisions offering enhanced active use of English language to students in comparison with traditional classroom teaching. The course administered in the lab aims to help students for whom English is not their first language find proper placement. It intends to make both language teaching and learning fun.

State of Art Modern Language Lab
Funded by TEQIP-III

Inauguration of the Language Lab

One Week Workshop on Research Methodology using SPSS & AMOS

8th-12th Feb 2020

About the Workshop

- The workshop was first of its kind in the valley where eminent experts of quantitative research from IIMs interacted with the students and taught them the advances in quantitative research in the area of Management.
- Most of the participants were from the valley and described the workshop as one of the best ever that they had attended.
- Senior academicians like Prof. M. A Sahaf and Prof. A. Salam interacted with the young minds and shared their thoughts and experiences being a researcher.
- Scholars not only learned about the usage of various statistical software but also gained insights about usage of plagiarism checking tools and referencing methods.
- All the participants praised the organizers and the experts for organizing such a workshop in NIT Srinagar.

Eminent Experts

- Dr Amit Shankar (IIM Vishakhapatnam)
- Dr Pooja Kumari (IIM Jammu)
- Prof. Ramendra Singh (IIM Calcutta)
- Prof. M. A Sahaf (Kashmir University)
- Prof. Abdul Salam (IUST)
- Dr. Sajid Yusuf Bhat (Kashmir University)

Marketing in the Post Covid-19 World

Prof. Ramendra Singh (IIM Calcutta)

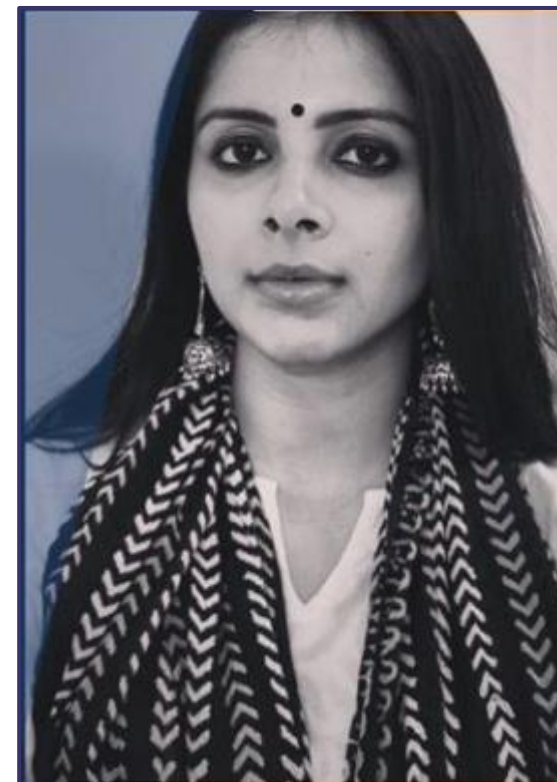

How to cope this business disruption

- Become agile and adaptable in the market
- High reliance on gig workers to manage manpower planning
- Re-jig your business model continuously
- Build resilience for business continuity
- Enhance use of technology, adapt to markets.
- Increase stakeholder engagement and depend on government support when required.

Mental Health During Covid-19

Dr Anjuman Bains (Counselling Psychologist)

- The Talk was about mental health in covid-19 discussed the uncertainties and worries that covid has brought us face to face with. The webinar expert focused on the solution-based perspective rather than the problems in the very gloomy pandemic engulfed environment. The session was specifically focusing on the student fraternity and the solution to their issues in the covid-19 period in terms of the mental health. Dr. Anjuman the expert for the talk, spoke about how we can bring normalcy in the Covid laden world.
- She pointed out factors and techniques that can help us find stability and peace especially in this era of speedy information flow through social and mass media which causes greater stress and anxiety. Dr. Anjuman gave a few pointers that can prove helpful. Some pointers like understanding how to build a routine, recognizing our feelings and dealing with them, importance of setting challenges for ourselves in order to keep ourselves mentally focused and fit were a few techniques that could help us stay mentally fit. The webinar discussed the importance of discussing positive and constructive feelings and things with our families instead of focusing on social media information regarding the pandemic.
- Dr. Anjuman shared how the factors instead of speculations can help us stay stable and mentally strong in fighting our fears and facing uncertainties. Dr. Anjuman stressed the importance of maintaining social networks with our families and friends, focusing on things that one can control like participating in workshop and webinars which will help us learn and add to our knowledge and restructuring our priorities as important steps for a healthy mind amid the pandemic when we are not able to go out and engage in routine activities like we could before the pandemic
- The webinar helped the students, scholars and other participants understand how setting realistic goals and finding out opportunities even in this pandemic can help us make the best out of this worst situation and make use of this time efficiently. Dr. Anjuman shared the importance of setting up boundaries within our homes since we are in the e-education period due to COVID-19, for creating different zones and having different spaces for a professional and personal activities.

The expert spoke about dealing with situations that students are facing at home due to domestic problems which is mostly not talked about. She emphasized the importance of building support systems in families to help ourselves and others in the family. The talk ended with a question answer session where the expert answered the queries of the audience which was helpful for everyone who was listening to the talk.

One Week STC on Basics of Management Research

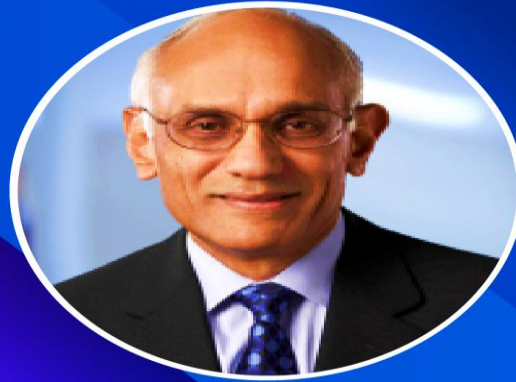

27-31st August 2020

- This workshop has been one of a kind and unique in terms of delivery of knowledge.

Starting a Sustainable Food Business

Mr. Javid Parsa

Chef Yasin

Mr. Amir Wani

Dr Rukhsar Shah

- At NIT, the guests on the occasion included Dr. Ruksar Syed Shah, Javid Parsa, Amir Wani, Chef Yaseen, and Farhat Sultana, all experts in food technology and food entrepreneurship.
- The experts discussed Sustainable development goals of food and the optimal use of the scarce resources available keeping in mind the food security issues.
- The speakers, experienced in food business for decades, talked about wastage of food and how to reduce it.
- “I don’t let food to be wasted because all my employees work with manoeuvre to save as much as they can and they seldom dine with the same food, if some is left in the evening, or otherwise if its to be wasted,” said Javid Parsa, who heads a chain of restaurants.
- “The additives which are present in frozen food should be avoided because they aren’t safe,” said Dr. Ruksar Syed Shah.
- “My main focus stays on to give and provide Authentic with healthy Wazwan (varieties of Kashmiri foods) to the community on time delivery,” said Aamir Wani.
- Another guest Chef Yaseen said: “We rely on our instincts and curiosity, but we should also rely on authenticity.”
- He also said, with proper awareness one can even innovate with the leftover food and the society too should align on this. The guests gave constructive feedback to students on how to refine their concepts of running this business without wasting food.
